MINI AND DIRECT DRIVE COMPRESSORS

Models: PT310, SF100S, SF2025
Great for the Builder and Handyman

PT310: MINI AIR COMPRESSOR

FEATURES:

Portable, Light Weight, Quiet, Oilless Design, Electric Compressor

The PT310 is an ideal compressor to have around the home for small jobs within 25 PSI. The PT310 can be used for a variety of blowing/inflation applications such as cosmetic air brushing, spray tanning, ball/bike tyre inflation and asthmatic nebulizers. The lubrication free operation and tankless design make the PT310 excellent for both shop and hobby work. The PT310 is quiet, low maintenance and can be plugged into any house hold power circuit. The mini PT310 makes an important addition to any handyman's tools and is also great for sports clubs and schools.

PT310

PT310 DETAILS				
MODEL	MAX OUTPUT (PSI)	DISPLACEMENT (CFM)	UNIT SIZE (cm)	WEIGHT (kg)
PT310	30 <i>use 25 in general</i>	2	12.5 x 16 x 20	4.5

SF100S & SF2025: PORTABLE AIR COMPRESSOR

FEATURES:

Heavy Duty, Low Speed, Light Weight, Quiet, Auto Shut Off, Portable, Direct Drive.

The range of Direct Drive compressors are larger than the mini PT310 and make an excellent tool for the builder or handyman who needs a powerful, yet compact, air compressor. The size and quiet running of the Direct Drive series makes them an ideal machine for schools, small businesses, tanning/beauty salons and the home workshop. Easy to use, these air compressors simply plug into a 240v power outlet and they're ready to start. The COM-PAK Direct Drive compressor range comes complete with a 12 month warranty.

SF100S

SF2025
