4 CFM (120 LPM)  
10L TANK CAPACITY  
SIZE: 50 x 20 x 50cm  
17kg

### MINI PT310

The mini PT310 is the most compact compressor in the COM-PAK range and is an ideal unit for small jobs. The oilless and tankless design make the PT310 easy to operate and suitable for applications such as: cosmetic air brushing, spray tanning, ball/bike tyre inflation, ceramics and asthmatic nebulizers.

### DIRECT DRIVE RANGE

The range of Direct Drive compressors make excellent tools for the builder or handyman who needs a powerful and compact air compressor.

The size and quiet running of the Direct Drive series makes them an ideal machine for schools, small business, tanning/beauty salons and the home workshop.

### 12 & 24 VOLT RANGE

Units come complete with tank and pressure switch, which allows you to run air tools.

All the COM-PAK Mini and DD range of air compressors are easy to operate, low maintenance and reliable.

All include brass hardware (no diecast) alloys and low speed 4pole HD Motors.
