EM310W

STANDARD FEATURES:

- Cartridge style air filters for maximum filtration.
- Intercooling, markedly reduces moisture content in your lines.
- All units feature an Australian made air receiver manufactured to AS1210 boiler specification and approved in all states of Australia.
- Heavy duty, cast iron, precision engineered pump which is protected by a well ventilated Australian made metal belt guard.
- Heat treated steel suction and discharge valves, ensure long life and maximum efficiency.
- Fully adjustable automatic stop/start pressure switch/starter.
- Slow revving, low vibration, overload protection.
- All steel is treated with primer/etch combined with two coats of industrial enamel.

COMPRESSORS COMPLETE WITH:

DLI approved Australian made air receiver, non return valve, safety pressure release valve, auto cut in/out switch, easy to read pressure gauge, drain cock, heavy duty wheels, quick seal snap release airline coupling, easy lift handles and replaceable inlet filters c/w noise dampeners for quiet operation.

YOUR GUARANTEE

Customers can rely on their COM-PAK compressor for years to come. All EM, PM and DM units are backed by a 24 month warranty and access to a complete range of spare parts, fittings and accessories.

All COM-PAK equipment is fully repairable and/or recyclable. Plastics and other throwaway materials are kept to a minimum.

CUSTOM MADE

COM-PAK specialises in building specific compressors to suit a diverse range of industries, applications and budgets. Supplying compressors from 2-52 CFM we can design something to suit your individual application whether it be for industrial or personal use.

COM-PAK also designs and installs complete airline fitouts for utes, offices and workshops.
